Figure S2A. GLEAN model and transcriptome model agree
Figure S2B. Same except single additional terminal exon added
Figure S2C. Same except multiple additional terminal exons added
Figure S2D. Transcriptome model causes revision of GLEAN model.
Figure S2E. Multiple GLEAN models at the same locus resolved
Figure S2F. GLEAN model not sufficiently expressed in this dataset.
Figure S2G. Transcriptome data cannot be solved
