Figure S15

The figure shows the mean fluorescence units plotted against the external IL4 level. The lines represent different conditions:

- **Blue dashed line** with circles: Gata3 Unstimulated
- **Blue solid line** with squares: Gata3 Restimulated
- **Red dashed line** with triangles: T-bet Unstimulated
- **Red solid line** with diamonds: T-bet Restimulated

The x-axis represents the external IL4 level, ranging from 0 to 540, while the y-axis represents the mean fluorescence units, ranging from 0 to 1600.
