Purpose

The Materials Research Society will serve and promote the common interests of those people involved in the preparation, characterization, design, and utilization of materials. Particular emphasis is placed on research activities involving the interfaces of many scientific and engineering disciplines. This is a professional society specifically designed to appeal to a community of scientists and engineers trained in a broad spectrum of fields: physics, metallurgy, electrical engineering, ceramics, chemistry, polymer science, engineering mechanics, chemical engineering, etc.

AGENDA

Introductory Remarks

Sustaining and Developing the Society

Meetings to be Sponsored

Other Activities and Plans

Election of Council and Officers

Applications for membership are invited from all materials scientists and engineers who wish to work actively to promote the purposes of the society, especially by:

1. Organizing and running appropriate meetings on topics cutting across all material classes.
2. Participating in sharing the Society-organization's work.
3. Relating the aims of the Society to similar organizations.
