Abstract

Keywords: CMS, physics, top, charge asymmetry
Figure 1: Reconstructed $\Delta|y_t|$ and $\Delta|\eta_\ell|$ distributions from data (points) and simulation (histogram), with the predicted signal ($t\bar{t} \rightarrow l^+l^-$) and background distributions shown separately. The simulated signal yield is normalized to that of the background-subtracted data. The vertical bars on the data points represent the statistical uncertainties. The lower panels show the ratio of the numbers of events from data and simulation.
