

Correction

BIOPHYSICS. For the article “Single-Molecule Chemistry and Biology Special Feature: Fueling protein–DNA interactions inside porous nanocontainers,” by Ibrahim Cisse, Burak Okumus, Chirlmin Joo, and Taekjip Ha, which appeared in issue 31, July 31, 2007, of *Proc Natl Acad Sci USA* (104:12646–12650; first published June 11, 2007; 10.1073/pnas.0610673104), the authors note that, due to a printer’s error, the first sentence of *Materials and Methods*, on page 12650, appeared incorrectly. “Lipid films were prepared by mixing biotinyl cap **phycoerythrin** with DMPC dissolved in chloroform (1:100 molar ratio) then vacuumed for 2 h,” should instead read: “Lipid films were prepared by mixing biotinyl cap **phosphoethanolamine** with DMPC dissolved in chloroform (1:100 molar ratio) then vacuumed for 2 h.” This error does not affect the conclusions of the article.
