SEISMOLOGY MICROFICHE PUBLICATIONS FROM THE CALTECH ARCHIVES

EDITED BY

J. R. GOODSTEIN, H. KANAMORI, AND W. H. K. LEE

In order to preserve important seismological documents and make them available inexpensively, the California Institute of Technology Archives (with partial financial support from the U.S. Geological Survey) has initiated seismology microfiche publications. The microfiche (Mf.) format is diazo positive film measuring 105 by 148 mm (4" by 6" size). Each microfiche contains 70 frames or less at a maximum reduction of 24 $\times$. At present, three series are available to the public at cost of reproduction and handling:

SERIES I

- (a) *Bulletin of the CIT Seismological Laboratory*, Pasadena and Auxiliary Stations, 1931-1968.

Monthly bulletins covering teleseismic shocks registered at the Seismological Laboratory at Pasadena and at auxiliary stations at Mount Wilson, Riverside, Santa Barbara, La Jolla, and Tinemaha and Haiwee (in the Owens Valley). *Bulletin* gives details of measurements for local and distant earthquakes in standard international form. Reports compiled by C. F. Richter and others. Additional stations added to southern California regional network later on. Title varies; changed to *Preliminary Bulletin* on January 1, 1957.

- (b) *Provisional Readings* at Pasadena (and auxiliary stations as noted), 1966-1974; changes title to *Airletters*, June 1, 1974-April, 1979.

- (c) *Station Clock Corrections*

Pasadena, January 1931-January 1973
 China Lake, September 1951-August 1975
 Mt. Wilson, November 1951-September 1970
 Riverside, November 1951-April 1979
 Palomar, December 1951-April 1979
 Santa Barbara, December 1951-April 1979
 Tinemaha, December 1951-April 1979
 Woody, August 1952-August 1970
 Fort Tejon, November 1952-August 1970
 Barrett, February 1952-April 1979
 Isabella, January 1954-April 1967
 Hayfield, January 1956-April 1979
 El Centro, January 1957-August 1970
 Goldstone, November 1961-February 1969
 Live Station, September 23-25, 1963
 Cotton, October 1965-April 1979
 Sawmill, March 1966-March 1976
 Rio Hardy, April 1969-January 1973
 Bahia de Los Angeles, December 1971-August 1973
 Guaymas, March 1972-July 1973

Obsidian Butte, May 1972–July 1972

Caborca, Sonora, July 1972–August 1973

La Paz, July 1972–August 1973

Topolobampo, August 1972–August 1973

Camp Pendleton, January 1975–April 1979

106-Mf. \$57.00

SERIES II

International Seismological Summary, 1918–1942

Beno Gutenberg's annotated copy of the ISS, Turner, H. H. *et al.* (1923–1952).

Only pages containing Gutenberg's penciled-in corrections and revisions for epicenter, origin time, and focal depth of shocks are included.

72-Mf. \$40.00

SERIES III

Gutenberg-Richter Notepads, 1904–1958

All the known unpublished original worksheets for *Seismicity of the Earth* (1954), including calculations and data relating to the magnitude scales employed by Gutenberg and Richter in their catalog.

116-Mf. with index \$64.00

Each Series can be ordered separately by writing to:

Attention: Dr. J. R. Goodstein
Institute Archives
California Institute of Technology
Pasadena, CA 91125, U.S.A.

Payment must follow within 30 days of receipt of invoice; discounts for cash with order 5 per cent and free postage. Postage (air mail overseas) is added.
