

Figure S1 **DIAP1 and Dronc half-life in S2 cells.** The disappearance of DIAP1 and Dronc were monitored over time in S2 cells following Western blotting with

DIAP1- and Dronc-specific antibodies. **a**, DIAP1 has a half life of about 40 minutes. **b**, Dronc has a half life of about 3.1 hours. **c**, Cycloheximide kills S2 cells.
