VOLUME II

LIST OF FIGURES*

CHAPTER 2 - FREE-RUNNING MODELS

- Figs. 2-1 through 2-4 - Construction techniques.
- Figs. 2-5 through 2-10 - USS Odax model.
- Figs. 2-11 through 2-28 - USS Albacore model.

CHAPTER 3 - EXPERIMENTAL TECHNIQUES

- Figs. 3-1 through 3-2 - Model performance
- Figs. 3-3 through 3-4 - Model preparation
- Figs. 3-5 through 3-6 - Test procedures

CHAPTER 4 - TEST RESULTS - USS ODAX MODEL

- Fig. 4-1 - Comparison of model test results for Program Cam No. 7 with Prototype Run No. 84.
- Fig. 4-2 - Comparison of model test results for Program Cam No. 8 with Prototype Run No. 87.
- Fig. 4-3 - Comparison of model test results for Program Cam No. 6 with Prototype Run No. 86.
- Fig. 4-4 - Comparison of model test results for Program Cam No. 5 with Prototype Run No. 194.
- Fig. 4-5 - Comparison of model test results for two series of runs showing effect of protective fenders and launching conditions with Prototype Run No. 84.

CHAPTER 5 - TEST RESULTS - USS ALBACORE MODEL IN VERTICAL MANEUVERING

- Figs. 5-1 through 5-2 - Correlation of trajectory histories.
- Figs. 5-3 through 5-10 - Directional stability - Phases 1 and 5.

Original Configuration

- Figs. 5-11 through 5-14 - Control response in dive and rise - Phase 2.
- Fig. 5-15 - Damping characteristics - Phase 3.
- Figs. 5-16 through 5-18 - Depth changing maneuvers - Phase 4.

Revised Configuration

- Figs. 5-19 through 5-22 - Control response - Phase 6.
- Figs. 5-23 through 5-28 - Depth changing maneuvers - Phase 7.
- Fig. 5-29 - Comparison of computed and experimental trajectories - Phase 7.

* All of the text, references and distribution list for this report will be found in Volume I. This volume contains only the figures.

Volume II

LIST OF FIGURES
(cont'd)

Chapter 6 - Test Results - U. S. S. Albacore Model in Horizontal Maneuvering.

- Figure 6-1 - Technique of Rotation of Trajectories.
- Figure 6-2 - Sensitivity of Model Response to Acceleration, Static Trim and Free Surface.
- Figure 6-3 - Dynamic Response in Horizontal Turning Allowing Depth Change.
- Figures 6-4 - Dynamic Response in Horizontal Turning with Depth
and 6-5 Control by Means of Stern Planes.
- Figure 6-6 - Dynamic Response in Horizontal Turning with Reduced Height Bridge Fairwater.
- Figure 6-7 - Dynamic Response in Horizontal Turning Allowing Depth Change with Roll Control.
- Figure 6-8 - Dynamic Response in Horizontal Turning with Depth Control and Roll Control.
- Figure 6-9 - Comparison of Dynamic Response in Horizontal Turning for Various Combinations of Control Actions for 35° Rudder Deflections.

Appendix B - Description of Controlled Atmosphere Launching Tank.

- Figures B-1 and B-2 - The Tank.
- Figures B-3 through B-5 - Launching Mechanisms.
- Figures B-6 " B-9 - Trajectory Recording System.
- Figures B-10 " B-14 - Trajectory Analyzing System.

Appendix C - Data Reduction Procedures.

- Figure C-1 - Plot of Raw Data For Typical Vertical Maneuver.
- Figure C-2 - Composite of Model Images and Trajectory Plot of U. S. S. Albacore Model.
- Figure C-3 - Effects of Film Curvature Variation between Camera and Projector.

NOTE: All of the text, references and distribution list for this report will be found in Volume I. This volume contains only the figures.
